

Murder mystery

Your task

There has been a murder. Can you help Detective Depiction? She found the murder weapon next to a camera and both had fingerprints from just one person all over them. Of course, she had the photos developed straight away. You need to see if you can help her look at the photos from the camera and work out who is the murderer.

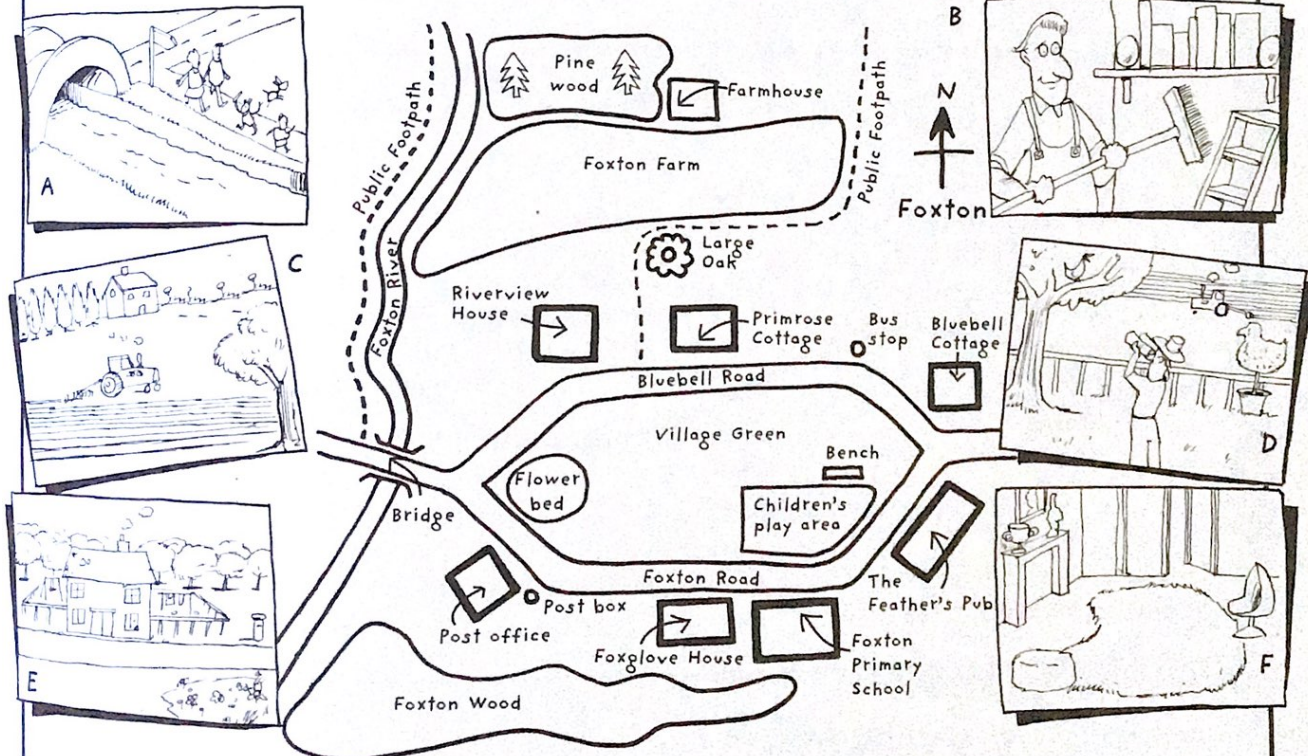

Here are the suspects:

Gerald Godfrey
Gerald lives on his own in Bluebell Cottage and has done for about 10 years. He loves DIY and is always changing the decoration in his house. He often throws dinner parties. Gerald also loves fishing. Gerald knows all of the other suspects quite well.

Karla Klein
Karla has recently moved into Riverview House after 15 years of living in a city. She loved the house as soon as she saw it because it was decorated in such a modern way. Karla only knows Gerald and Nigel from the village. Karla loves playing golf and tennis and is a really skilled player – especially of tennis.

Cathy Caterham
Cathy has lived in Foxglove House all her life. Her husband and two children (Felix – 4 and George – 6) also live with her. Cathy and her family are extremely busy and their house is always in chaos! Cathy loves painting. All of her family love going for long walks outside with their dog, Bruce, whatever the weather.

Nigel Norton
Nigel Norton has lived in Primrose Cottage for 47 years. He is a retired teacher and used to teach in the local primary school. In his spare time, he loves bird watching. He also loves gardening. In fact, both his house and garden are always well kept – and he often shapes his hedges to look like birds and animals.

Try and work out where these photos were taken from and who or what each photo is showing. This should point you to the murderer.

Once you have worked out who the murderer is, draw four more photos that the murderer might have taken that either prove that they were the murderer or prove that one of the other suspects was not the murderer.
